"I think metal fabrication methods are helping reinvent furniture profiles."

—Jen Alruz, Perkins + Will

Q What materials are giving furniture a new shape?

"Metal furniture designs continue to inspire and take center stage. Case in point: Coraggio's Pocket lounge chair moors so sleekly in its hammered-bronze base. Stately and sublime, it's an 'it' chair without trying too hard."

—Laura Zender, *Laura Zender Design*

"Digital printing: It's limitless...and scary."

—Nathan Lee Colkitt, *Colkitt&Co.*

"Resin. It gives you the freedom to mold interesting shapes, allowing you to think outside the box."

—Kevin Caulfield, *Nemaworkshop*
